The Moral Machine Project

www.moralmachine.net

Children: There is a runaway trolley. If you do nothing, it will kill five strangers. If you pull a lever, it will be diverted onto another track and kill your four children.

Seatbelt: An autonomous vehicle is unable to stop. If the programming does nothing, it will crash into another vehicle containing a passenger who is not wearing a seat belt. If the programming diverts, it will crash into a vehicle containing a passenger that is wearing a seat-belt.

Order of presentation changes how subjects assess trolley-type cases.

Details change how subjects assess trolley-type cases.
